## Western Farmers Advised to Hold Grain Deliveries

Clarification of Coarse Grains  
Price Policy is Sought

Clarification of the government policy as to removal of price ceilings on coarse grains on October 31st is sought in a telegram forwarded to Prime Minister Mackenzie King by the North West Line Elevators Association. The matter arises through a letter forwarded to 25,000 Manitoba Pool members by W. J. Parker, first vice-president of the Manitoba Wheat Pool in which he advises farmers to withhold delivery of all coarse grains owing to the possibility of early removal of price ceilings on oats and barley.

The wire sent to the prime minister follows:

"In a letter mailed to 25,000 Manitoba farmers, W. J. Parker, president of Manitoba Pool Elevator and first vice-president of the Canadian Federation of Agriculture, advises farmers to withhold delivery from market of oats and barley. In support of his advice to farmers, Mr. Parker contends that present regulations provide for ceiling prices only until October 31st and indicates the possibility price ceilings on oats and barley may be removed at that

time.

"The minister of agriculture has indicated in Parliament the Canadian Federation of Agriculture acts as advisor and confidant of the government in the creation of agricultural policies. This was particularly evident in the negotiations on the British Wheat Agreement and prices fixed thereunder and in the adoption of a policy whereby western farmers have been compelled to supply eastern feeders with feed grains below market values. Mr. Parker is one of the principal executives officers of the Canadian Federation of Agriculture which body along with the three Wheat Pools, advocated and upported the policy of cheap wheat to the British and cheap coarse grains to the east at the expense of the prairie farmer. It is apparent that he has changed his mind and hopes for a revision of these policies at this belated hour. In view of the important role occupied by the Federation in the creation of government policies, we feel compelled to inquire whether price ceilings on oats and barley will be removed October 31

"It has been our understanding that oats and barley were urgently needed now by eastern feeders in view of the partial failure of eastern crops this year but in face of the letter written to Manitoba Pool farmers by Mr. Parker, we are disposed to advise customers of Line Elevator Companies to withhold sale of their oats and barley until the government issues a clear statement of policy on prices of oats and barley for the balance of the current crop year. Under the price ceilings now imposed the farmer is compelled to accept \$1.20 less than the market value of his barley and 66 cents less than the value of his oats. We have urged and we urge again that in fairness the farmer should be allowed to receive market values for his oats, barley and wheat, and that a clear statement of government policy on grain prices be issued.—North West Line Elevators Assoc."

## Nutrition Question Box

School bells are ringing again and the question most frequently asked just now is "What will we put in the school lunch box? No question has much greater bearing on the health of our boys and girls. In order to get all the foods essential for growth, halt hand progress in school work children need three good meals a day.

Planning the noon lunch is not just a matter of providing food to fill up a cavity and keep the youngster going until he gets home for dinner. If the child is to get all the food essentials he needs each day it is important that he have a good lunch, good meal, milk, or food with milk or cheese, eggs, or peanut butter, a fruit or a vegetable, preferably raw.

Write to the department of agriculture, Edmonton, for the bulletin, "Lunch Boxes and Hot School Lunches."

## The World of Wheat Cheap Good Seed

Some farmers each year decide they would like to buy quite a large quantity of good seed, but do not want to go to the expense of purchasing a large amount of fairly expensive registered and certified seed.

In almost every district there is a source of cheap seed available to farmers, some of which is often quite as good as registered or certified seed. These stocks are sometimes known as crop testing plan A seed. Such stocks are represented by the tests that were made on samples of farmers' fields growing this summer. Some of these stocks were classed by professional cerealists and plant breeders as being almost completely true to variety. A simple inquiry by any farmer among his neighbors or from elevator agents will give him the location of some nearby farmers who have some of this crop testing plan A stocks in their bins.

Farmers who own these stocks as a rule are willing to sell them to their neighbors for a small premium.

When stocks pass from farmer to farmer there is no need to have them inspected by the government even though some of them may be equal to registered or certified seed. This is certainly a way for farmers to secure fairly large quantities of good seed of the variety required and at a cheap price.

## CARBON NEWS

Born -- to Mr. and Mrs. Geo. King, a son, September 15th.

Irricana will play Three Hills for the Kneehill Baseball League cup according to President Lammle. Swallowell, Beiseker and Carbon had a chance to represent the south section but were unable to get the games played. As Irricana was at the top of league it was decided to let them enter the playoffs.

Rain and snow has again delayed harvest operations in the district.

Carbonites are on the move. It is reported that Mr. and Mrs. Norman Nash will move into the Midland Pacific house. Mr. and Mrs. Don Martin will reside in the house vacated by the Nash's; Mr. and Mrs. J. Adams are moving into the C. H. Nash residence and Mr. and Mrs. Nash will reside in the house at present occupied by Mr. and Mrs. Dick Gimbel.

READ THE ADS! IT PAYS!

CHRIST CHURCH, CARBON

Morning service will be held on Sunday, Sept. 28 at 11 a.m., Canon T. B. Winter in charge.

## OFF THE RECORD

With the return of a buyer's market merchants say conditions are changing and more sales talks are necessary now to sell even good materials or clothes. Yes, we suppose they can always tell a good yarn!

## Soil Conservation

THE QUESTION OF SOIL CONSERVATION in Canada has taken on growing importance in recent years. The abundance of good land, and the general high fertility of the soil did not lead those who came to open up the country's great farming areas to think seriously of soil conservation. It is now apparent, however, that to retain the fertility of the soil in many parts of the country is becoming a very grave problem. It is disturbing to contemplate the possibility of many of Canada's rich farming districts some day becoming waste lands, but there is apparently real danger of such a situation occurring if successful methods of soil conservation are not practiced.

### Soils Experts Give Warning

At the annual meeting of the soils group of the Agricultural Institute of Canada, held recently at Lethbridge, this problem was discussed at length by leading soils scientists from various parts of the Dominion. Dr. J. L. Doughty of Swift Current, officer in charge of the Dominion Soils Research Laboratory, spoke of the serious situation arising from the reduction of organic matter in the soil, and stated that this condition had been said to be "sounding the death knell of prairie agriculture". He pointed out also that eighteen per cent. of the nitrogen and twenty per cent. of the organic matter has been lost to the brown soils of the prairies since they were first cultivated. Reasons for these losses were said to be such factors as fallow, hail, frost, rust, insects and new varieties of grains. It was impossible, the group was told, to estimate the single effect of any of these causes.

### Is Important To Farmers

Dr. P. O. Ripley of the field husbandry section, Dominion Department of Agriculture, spoke of soil erosion, and said that water erosion was becoming a very serious problem. It was recommended that a thorough investigation of soil erosion under varying climatic conditions should be made in locations where the need was evident. Dr. G. N. Ruhnke, of the Ontario Agricultural College, Guelph, discussed the value of fertilizers in soil conservation and said that they should not be regarded as temporary measures, but as a permanent factor in preserving the fertility of the soil. These scientists have added their warnings to those of many other agriculturalists and geologists who are constantly drawing attention to the need for continued action in the matter of soil conservation. Much is now being done through the P.F.R.A., Dominion and Provincial Departments of Agriculture, and agricultural organizations, but it is clear that the problem is one of which each farmer should be thoroughly aware, and in which he should co-operate in every possible way with those who are endeavoring to solve it.

### Woman Tourist Was Very Lucky

A search through her purse for a nickel in a phone booth at a hotel in Fort Erie, Ont., almost cost a visiting American tourist \$2,000 in jewelry. A woman who refused to give her name, was searching through her purse in a public telephone booth when a diamond bracelet and two diamond rings dropped from her bag. She got as far as Niagara Falls, Ont., before noticing her loss, and hurriedly made her way back to the hotel. In the meantime, a guest, giving his name as Jack Bell of Toronto turned the gems into a room clerk. She left a \$10 reward for bell.

### LEARN HAIRDRESSING

Clean, steady, interesting, refined, good paying profession. Hundreds of positions now open. Many start own shops. Train under direct supervision of outstanding beauty culture experts. Complete, thorough, superior training. The Nu-Fashion method assures success. Write or Call—

### Calgary's Pet Freak Is Two-Headed Trout

CALGARY.—A two-headed speckled trout raised in the hatcheries of a Calgary brewery continues to baffle his attendants—even if it is living on borrowed time.

Now 15 months old the pet freak is expected to continue to live the normal life span of an ordinary trout. The fish rests and swims on its side, and though it is not as agile and swift as a normal trout, it is able to get about with fair facility. Although the second head of the trout is not used by the fish for eating, it has eyes and breathes normally.

Attendants feed the fish on small crumbled fry and because it is taking life so easy—no competition at meal times—it's getting fat.

If the fish were to be placed with other fish the same size or larger than itself they would kill it. On the other hand if it were placed with smaller fish than itself it would kill them.

To avoid such a happening the attendants have exiled the fish to a trough where it lives in solitary grandeur.

This type of "freak fish" while comparatively rare, does appear in the fry stage now and again, but generally never reaches the age or size of the present one.

### GEMS OF THOUGHT

#### READING

Reading serves for delight, for ornament, for ability. The crafty condemn it; the simple admire it; the wise use it.—Bacon.

You may glean knowledge by reading, but you must separate the chaff from the wheat by thinking.—Osborn.

We should accustom the mind to keep the best company by introducing it only to the best books.—Sydney Smith.

As you grow ready for it, somewhere or other, you will find what is needful for you in a book.—George Macdonald.

Rightly to read and to practise the Scriptures, their spiritual sense must be discerned, understood, and demonstrated.—Mary Baker Eddy.

And, behold, a certain lawyer stood up, and tempted him, saying, Master, what shall I do to inherit eternal life? He said unto him, What is written in the law? how readest thou?—Luke 10:25, 26.

#### IF TEMPERATURE FELL

A ten-degree drop in the temperature of the earth as a whole would, in time, cover Canada, the Scandinavian countries, and much of the United States with great ice sheets.

Mars is only one-tenth as heavy as the earth.

**WINS SCHOLARSHIP**—Honor graduate in business administration at the University of Western Ontario, Miss M. G. Carlson of London, Ont., shown here, has been awarded the J. William Horsey scholarship, valued at \$3,000 or \$1,500 a year for 1947 and 1948, plus travelling expenses. This is the second award of the fellowship established in 1945 by J. William Horsey, president of Dominion Stores Ltd., to promote research into food production costs. The award is open to graduates in business administration, commerce and finance at any Canadian university.

## FUNNY And OTHERWISE

The minister had come to call and was holding the small boy of the house on his lap.

"So, you can count, eh?" he said to the youngster. "Well, let's hear you."

The lad met his request with alacrity: "One, two, three, four, five, six, seven, eight, nine, ten, jack, queen, king."

An attendant in an Aberdeen cinema found a ten-shilling note. She took it to the manager.

Later the following notice was screened:

"A 10s note has been found in cinema. Will the owner please queue up at the box office at 10 a.m. tomorrow?"

Doctor—"You are suffering from indigestion. Drink a glass of hot water every morning."

Patient (star boarder)—"I have been doing that for months, doctor, only my landlady calls it coffee."

Patient (in waiting room of doctor's office): "How do you do?"

Second Patient: "So-so. I'm aching from neuritis."

First Patient: "Glad to meet you. I'm Mendelbaum from Chicago."

A certain minister, while preaching, said that every blade of grass was a sermon. The next day he was amusing himself by mowing his lawn when a country yokel passing shouted, "That's right vicar, cut your sermons short."

"Where's your husband?" asked a friend who dropped by.

"Just walk down to the bridge," the wife replied caustically, "and look around until you find a pole with a worm on each end."

Irate Guest — "Look here, the rain is simply pouring through the roof of my bedroom."

Summer Hotel Proprietor—"Absolutely according to our prospectus, sir, running water in every room."

"What's that piece of string round your finger for Bill?"

"That's a knot. Forget-me-not is a flower. With flour you make bread, and with bread you have cheese. This is to remind me to buy some pickled onions."

"Eternity is so vast—who can comprehend it?" said the speaker. "Perhaps," said the little man in the back row, "you never bought anything on the monthly payment plan."

The cop noticed the man coming down the street in a barrel. "Look here, fella, the officer said: 'What's the idea of the barrel? Are you a poker player?'"

"No, sir," the man replied. "But I spent a couple of hours with some guys who are."

He (haughtily): "I can go out with any girl I please." She: "It's too bad you don't please any of them."

## Beacons Will Open Up Arctic For Aircraft

Three long-range electronic "beacons" are being built on the North American rim of the Arctic ocean to open the frozen Arctic to aircraft, it has been disclosed at Washington.

The navigation stations, built jointly by the United States and Canada, probably will be in operation by late October, army air force officials said. The stations are located at Point Barrow in Alaska, at Campbell Lake near the northwestern corner of Canada, and far to the east on Victoria Island off the northern coast of Canada.

Air force experts said the network will enable planes carrying electronic receivers to determine their exact position, and thus remove navigation stumbling blocks to across-the-pole hops to Europe.

Long-range planes flying northward out of Canada over the pole could pick up other navigational aids in Finland and continue down into Europe, A.A.F. officials said. Range of the network was not disclosed, but officials said it eliminated a great "navigation blackout" covering thousands of square miles in northern Canada.

### Canadian Girl Runs Paper In Yukon

An interesting item which appeared in an English newspaper is entitled "An Alaskan Editress". We quote the item from the Yorkshire Post, as follows:

"Miss Georgina Murray, a Canadian girl who as a member of the W.R.N.S. was attached to the Public Relations branch of the Canadian Navy and spent two years in London during the war, has become a newspaper owner and editor in one of the most northerly inhabited regions of the world. Her paper is the Alaska Highway News, a flourishing weekly which, printed at Fort St. John, near the borders of the Yukon territory, circulated among trappers, prospectors and miners, as well as millionaire sportsmen from the United States flying north to Alaska."

"Miss Murray's printing machinery had to be flown to Fort St. John, where life is still primitive. A recent report in the Alaska Highway News told how a three-year-old child had to crawl through half a mile of snowdrifts to bring help to his sick mother. And a culinary hint recently printed informed the housewives in the frozen north that bear meat soaked in brine made an excellent substitute for smoked ham. Conditions out there, it seems, are not unlike those recently experienced in Yorkshire. But in Yorkshire we have, alas, no bears."

#### A REAL MENACE

Men and management of the Lancashire cotton trade are pressing Sir Stafford Cripps for action, as the menace of the cheap Japanese cotton, produced by cheap Japanese labor, grows daily greater.

## Millionaire Valued First Dollar Earned

HOUSTON, Texas. — A dollar's a dollar even to a millionaire. W. F. Hubbard, Houston, Texas, superintendent of money orders and postal savings for the U.S. government, notified a former Houston man, now a New York millionaire, that the \$1 he had left in postal savings there more than 20 years ago was now \$1.40.

The man said he'd claim the money, as it represented one of the first dollars he ever made.

#### ORGANIZED LABOR

About 160,000 honey bees are required to gather and prepare a pound of honey. Half fetch the nectar. Half wave their wings to evaporate the water off it and perform other hive chores.

Below are the winners of the Wilson Fly Pad Contest No. 1  
1st Prize, \$100.00—Stephen Var-emko, Tangent, Alta.  
2nd Prize, \$50.00—Mrs. Clifford Moore, R.R.2, Barsa, Corner, Lun. Co., N.S.  
3rd Prize, \$25.00—J. Loucks, Neuburgh, Ont.

15 Prizes of \$5.00 Each  
Miss Bernadette Houle, Ste. Anne Des Monts, Co. Gaspé, P.Q.; Mrs. F. B. Smith, Box 127, Mossbank, Sask.; Mrs. Will Curtis, R.R.3, Belwood, Ont.; Mrs. Herman Keith, Frontier, Sask.; Mrs. Ludwine Balle, Box 111, Fisher Branch, Man.; Mrs. A. E. Greenwood, Whiteside, Sask.; Paul Albert Charbonneau, Cote des Perron, Ste-Rose, Co. Laval, P.Q.; Mrs. R. M. Laudon, R.R.3, Sarnia, Ont.; Roger Croteau, R.R.1, St. Elie d'Orford, Co. Sherbrooke, P.Q.; Mrs. E. J. Shier, Semans, Sask.; Geo. Ouellet, 77 Rue St-Olivier, Quebec, P.Q.; Billy Erickstad, Baldonnel, B.C.; Ivy Potter, Rochford Bridge, Alta.; Mary A. Crowe, Norton, N.B.; Mrs. James Hayes, Box 146, Sundridge, Ont.

**WILSON'S FLY PADS**  
The cheapest, most convenient way of killing flies. No fuss, no muss, when you use WILSON'S FLY PADS. Buy some today and let WILSON'S FLY PADS do the work for you. They have worked for Canadians since 1880. Still only 10c.

## Delicious CRUMB COFFEE CAKE

#### Recipe

Add 1 envelope Royal Fast Rising Dry Yeast and 1 teaspoon sugar to ½ cup lukewarm water, stir and let stand 10 minutes. Scald ½ cup milk, add 3 tablespoons shortening, ½ cup sugar and ½ teaspoon salt; cool to lukewarm. Add 1 cup sifted flour to make a batter. Add yeast mixture and 1 beaten egg. Beat well. Add 2½ cups sifted flour, or enough to make a soft dough. Knead lightly; place in greased bowl. Cover; set in warm place, free from draft. Let rise until doubled in bulk, about 2 hours. Roll out dough to ½" thickness and place in greased shallow pan. Let rise in warm place, free from draft, until light, about 1½ hours. Prick top with fork and brush with 3 tablespoons melted shortening. Cream 3 tablespoons butter or shortening, add 3 tablespoons sugar gradually, mixing well. Add ¼ cup sifted flour, ½ cup dry, ½ cup cake or bread crumbs, and ½ teaspoon cinnamon; stir until well mixed and crumbly. Sprinkle on top of cake. Let rise again in warm place about ½ hour. Bake in moderate oven at 400°F. about 20 minutes.

## WORLD HAPPENINGS

### BRIEFLY TOLD

Next Dominion convention of the Canadian Legion will be held in Saskatoon next May 23-27.

R.A.F. aircraft are to get back their pre-war marking of the red, white and blue circles on the wings.

The Province of Quebec recently paid the French Government \$4,726,000 in full to settle a loan contracted in 1894.

Women volunteers known as "Salvage Sallys" call at each house in Hampstead borough once a week to collect waste paper.

Civilian employment in the United States mounted to an all-time high of 60,079,000 in July, the census bureau reported.

A woman in Holyoke, Mass., who received \$99 from the public welfare department in 1930 has returned the money—17 years later.

The local football club of Long Sutton, Lincolnshire, England, will dye its amber sweaters red because no team has ever won in them.

A group of 54 British architects and city planning experts, members of the Town and Country Planning Association of Britain, made a brief study tour of Sweden recently.

## Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

CERTIFIED MILK NOT ALWAYS SAFE

Opponents of milk pasteurization are still using the argument that certified milk—high grade milk from inspected herds which is produced under sanitary conditions—is as germ-free as pasteurized milk. Animals in certified herds are inspected twice a year for tuberculosis and other diseases.

However, these pasteurization opponents fail to point out that disease can occur in the periods between examinations. They fail to point out that one diseased animal can infect an entire herd, certified or otherwise. For instance, it sometimes has been estimated that one in 200 negative tuberculin tests on cows is false. Therefore, if all the approximately 3,900,000 cows in Canada were T.B. tested, this would mean that 19,500 were false negatives—and those 19,500 animals could produce a lot of disease-laden milk, and could pass the infection on to thousands of other animals.

Milk, to be absolutely safe for human consumption, should come from healthy, clean cows, it must be cleanly handled, and it must be pasteurized. Pasteurized milk is the only safe milk.

Summer vacationists who are unable to obtain a regular supply of the commercially pasteurized product, should pasteurize their own milk. Methods of home pasteurization may be obtained by writing to the Health League of Canada, 111 Avenue Road, Toronto 5, Ontario.

### Special Buses Are Most Luxurious

The Pathfinder says a chauffeur-driven bus eases the president of a Texas ice company around the 1,000-mile circuit of his plants.

With all the comforts of a Park avenue penthouse, it has two master staterooms, showers, a galley, refrigeration and air-conditioning.

This was only one new luxurious home-on-wheels praised recently by the Automobile Manufacturers Association. Other specially converted standard buses are used by:

A Midwest plastic surgeon, who uses his for pleasure travel.

A Detroit auto dealer, whose special bus is a travelling salesroom for motor parts.

### CARGO OF BIBLES

Carrying a cargo of Bibles, the 163-foot missionary schooner Morning Star VI sailed from Boston to the Marshall and Caroline Islands, whose natives have welcomed five similar ships from this port since 1856.

### Public School Has Glass Walls

FERGUS, Ontario.—If you live in a glass house don't throw stones. This will probably be the paramount rule for public school students at Fergus, Ontario, next fall. A new single-storey, glass-walled, c-shaped school holding 400 pupils has replaced the original 76-year-old structure. There is an outside exit for each classroom, reducing fire hazards.

### POWDER REDUCES ELECTRICAL SHOCK

Static reducing powder, that can be blown into automobile inner tubes, lessens the electrical shocks that sometimes occurs when a car is touched and also the electrical interference with radio reception. The powder clings to the walls of the tube and changes the electrical behaviour of the tires.—Scientific Service.

### THIS CURIOUS WORLD By WILLIAM FERGUSON

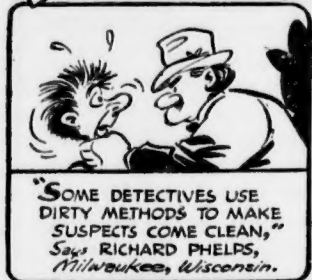

COPY, 1913 BY NEA SERVICE, INC. T. M. REG. U. S. PAT. OFF.

CALIFORNIA PRODUCES THE BIRTHSTONES FOR EVERY MONTH EXCEPT MAY AND JULY. (EMERALD AND RUBY)

### QUOTING ODDS

### BUSINESS AS USUAL

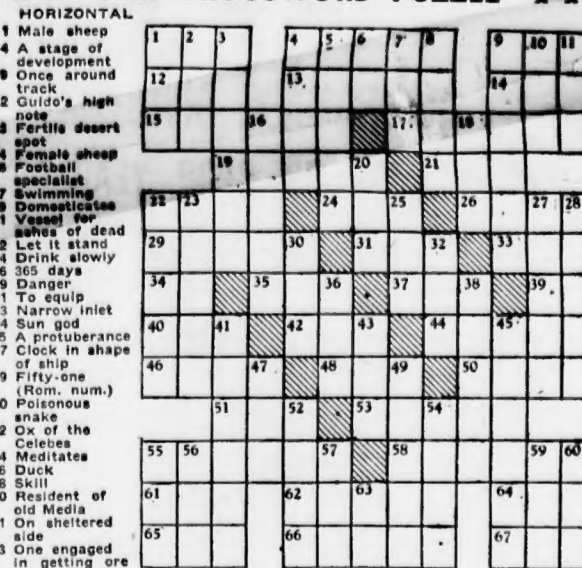

Nauru, the island of fertilizer, which lies in the Pacific near the equator, and was captured by the Japanese in 1942, and re-occupied by the Allies in 1945, is now shipping its valuable phosphate rock to Australia and New Zealand once again. Re-equipped by Australian interests, it is expected that annual shipments may reach 500,000 tons this year.

### OVER MILLION MILES

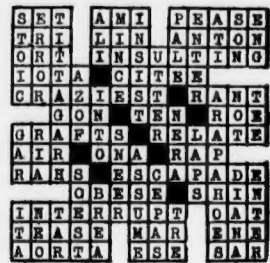

Harry Burns, 70-year-old veteran of 39 years on Toronto street railways, has hung up his conductor's cap for the last time. He said careless truck drivers and inebriated were his worst worry and estimated he travelled about 1,170,000 miles averaging better than 100 miles a day.

**Province to Order  
50-Mile Speed Limit**

Early action of a positive nature is to be taken by the provincial government to curb excessive speed on highways, according to information received by officials of the Alberta Motor Association.

or Association.

It is planned to issue a proclamation fixing 50 miles per hour as the maximum speed for motor cars on highways. During the summer the public works department announced that the maximum rate was 50 miles per hour but this was more in the nature of a request which it was hoped would be observed.

Provincial authorities say that high speeds still are being maintained and the number of accidents is on the increase. Consequently the alternative is to proclaim a new speed rate and instruct police officers to enforce it, according to provincial authorities.

The need of greater safety on the highways is a matter receiving the continuous attention of the AMA and it is expected to be discussed at the annual branch meetings to be held later this year.

**Russian Knapweed**

Russian Knapweed, one of the five bad weeds, is found in Alberta. It is very persistent once established. The plant is described as a perennial reproducing roots, rhizomes and seeds. He says that it may be distinguished by its flat colored flowers in small flash-shaped heads. These heads are less than half an inch in diameter and are borne singly on long stems. A gray "mat" covers the young stems and remains upon the lower part of the stems making them sticky to the touch. Other distinguishing features the dark brown or nearly black perennial roots and somewhat shredded appearance of the mature plant. The plant grows from one to two feet high and is somewhat branched.

Fortunately for us, Russian Knapweed is still generally found in patches, a situation which lends itself to chemical control and eradication. Sodium chlorate when applied at a rate of about three pounds per 100 square feet has been found effective. Very little work has been done in this province with sodium chlorate on Russian Knapweed, but some reports indicate that this plant is susceptible.

The first principle of weed control is to prevent introduction. Buy good seed from reliable firms. Many serious weed problems in Alberta could have been avoided by refusal to purchase cheap, low grade seed.

**Of The Record**

With the price of oil and coal continuing to rise still further it is expected that Canadians will have to spend much more money for fuel this coming winter. Yes, in order to keep warm they'll really need to have money to burn this year.

**Commercial Printing**

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in with ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

**Wallace Publications**

by Ottawa observer

There is obviously general agreement here in favor of the address made by Canada's minister of Agriculture, J. G. Gardiner, to the people of Britain. The principal points he made which evoke so much enthusiasm and agreement are:

1. That Canada will join in any world wide effort, which is mutually beneficial, to so distribute our surpluses as to do the greatest good to the greatest number in the world.

2. Until it is possible to obtain world trade agreements which we prefer, the Canadian government will look after the interests of her producers by making the largest number possible of mutually beneficial agreements with other countries. "We will hold to any security which has already been achieved through contracts with the United Kingdom until such time as multilateral arrangements are possible which stabilize returns," said Mr. Gardiner and one cannot find many in the capital to quarrel with his stand.

The Danger of Inflation

It is easy to find observers and politically minded people of all occupations to tell you something of the cause of the present economic "crisis" in Britain which is causing much concern and dislocation in other countries. Most agree that a measure of world wide inflation has greatly increased Britain's expenditures and limited her purchase of badly needed machinery and other "capital goods."

It is obvious that the greatest impediment to the control of inflation comes from the action of various kinds of pressure groups each intent on the solution of their own special problem. The most powerful and dangerous pressure groups are of course, socialistic planners who attempt to plan on a national basis. Many claim that while half of Britain's troubles are due to world difficulties beyond her control the other half are due to the failure of the British government to plan her own affairs wisely. Progress or Reaction?

While there is much interest here in the proposal of socialist Britain's foreign minister Bevin for a British Empire customs union it is difficult to find crystallized opinion, certainly difficult to find many who favor it.

To this observer it appears that Canadians are pinning their hopes on the United Nations and co-operation with all countries of the world. It is recognized that only by such co-

operation can we maintain our high level of employment and our standard of living. Empire agreements, unless they are taken merely as a first step toward world agreements, can only mean a lowering of the high objectives which inspired our membership and support of the United Nations. It is a matter which will affect the income and living standards of each Canadian.

## Unnecessary Advice

Perhaps it is because Canada is a small country that so many visitors from abroad feel they should advise us to copy some other country. In any case we Canadians continually find it necessary to subdue our resentment and speak kindly to our visitors. Last week James Crawford, a labor M.P. from Britain said in Toronto that Britain's troubles, which include a reduced standard of living for her people, came from the failure of her former allies to help her carry her burdens.

Another socialist, Morgan Phillips, asked Canadians to accept socialist (CCF) rule so that all Empire countries would be under socialist domination. As Canadians enjoy the highest per capita income and greatest prosperity of all Empire countries one is inclined to wonder at the arrogance of those from other countries who would ask us to give up the advantages we have.

## Facts of Interest

Under the British Import of Goods Order 1940, as amended goods may be imported into the United Kingdom only under the authority of a license granted by the Board of Trade.

## OUR HALF ACRE

## Perennial Weed Control

Canada Thistle is by far the most widespread perennial in this municipality. Toad Flax is another perennial weed that is giving trouble in some areas. The control measures for these weeds are very similar and contrary to the belief of some farmers these weeds can be successfully eradicated by cultivation.

These are a few points that should be kept in mind when combatting Canada Thistle.

Cut and burn all mature growth to prevent scattering of seed.

Cultivate thoroughly in the fall using a sharp duck foot cultivator or a tiller. Shallow cultivation is just as effective as deep cultivation.

When cultivating make sure that every shoot is killed. Do not allow new growth to remain more than a week after it emerges before cultivating again.

Continue cultivation right up to freeze up.

Success in controlling Canada Thistle or any other perennial weeds depends upon the thoroughness and persistence of the operator. An all out effort now will go a long way toward the complete eradication of this pest.

If you have a particular weed problem the field supervisor will be glad to discuss it with you.

## FARMER'S COLUMN

By R.J.M.

Something new has been added. Sweet clover weevils (*Sitona cylindricollis*) has invaded the district, yes, just south of Strathmore. What will happen to our honey crop? What will happen to our sweet clover hay crops and green manure crops? We no sooner find out the control method and way to combat one evil when another strikes to command our attention. If I have your attention, read on.

his new insect was discovered by Bill Bates, and then only by accident. He cut his sweet clover hay crop and a few days later he saw that his alfalfa field alongside the former sweet clover patch was being stripped of its leaves. He investigated and found the sweet clover weevil.

We do know that a fair measure of control can be had by ploughing down the growing crop of sweet clover to a depth of six inches in the fall but in this way we lose our hay crop. A second control measure is to dust or spray with a three percent DDT dust. That is to say, if the hay crop has been cut and the weevils move into your alfalfa, a dusting of the alfalfa with a three percent DDT mixture will reduce the number and effect control.

This insect has two prolegations a year. The first family can fly, thus seeking new locations to feast on sweet clover. The second generation do not fly but are the means of propagation for the next year. This beetle is almost nocturnal in its habits as it does not work actively during the bright sunshine therefore you will be obliged to look at the base of the sweet clover or alfalfa plants to find this pest.

The dusting should cover a surface of five feet wide on the effected alfalfa field. As the weevils move ahead they consume the dusted plants and are destroyed.

G. A. Hobbs, entomologist, advises that alfalfa and sweet clover should not be planted close together so as to avoid the movement from the clover after cutting to the alfalfa.

I inspected the infested field and found the weevils were dying on the portion that had been dusted. They seem to disintegrate and fall apart after being killed by the DDT. A sample of the insects and the damage they do to alfalfa are on display in the district agriculturists office.

Last year the weevil was reported at Gleichen and this year they are reported at Duchess and throughout the Eastern Irrigation District.

## Junior Wheat Club Winners

Howard Roppel and Harvey Katterhagen, members of the Rockyford junior wheat club, were winners of the provincial championship in grain judging and will represent Alberta in the Dominion grain judging competition to be held at the Royal Winter Fair in Toronto. These boys have excellent records in junior wheat club work and are deserving congratulations on their success.

## Those Fall and Winter Litters

A little attention to the sow at farrowing time will reduce loss and increase hog production. A. J. Charnetski, live stock supervisor for the Alberta department of agriculture says that it is not too early to start planning for fall and winter litters now.

A stack of early cut, well cured alfalfa should be placed near the piggery so that brood sows and other pigs can be given a forkful each day when green pasture is no longer available. Sods or other clean dirt should be put up before the snow to furnish the iron needs of the new born pigs. A solution of iron sulphate sprinkled over the dirt and made available to the little pigs will prevent anemia. This does not mean that the use of reduced iron is not satisfactory for the prevention of anemia but the provision of sods or clean dirt will help to satisfy that natural pig craving to root around.

Last winter several producers reported excellent results from the feeding of cod liver oil to pregnant sows starting about 4 weeks before farrowing. It seems to build up the reserves of vitamin A required in the little pigs before birth, so that they may be able to withstand infection. In this way they are better protected against unfavorable conditions than the litters of sows that do not receive this treatment.

To ensure strong litters remember the importance of the balanced ration, with proteins of animal origin, such as skimmed milk, tankage, meat scraps or protein concentrate. Sows should be fed some distance from the sleeping quarters to compel them to take daily exercise.

Share the harvest with the editor. Renew that subscription today.

**INDONESIAN REPRESENTATIVES TO U.N. SECURITY COUNCIL**—Amid charges that Dutch and Indonesians were violating the truce, Walter Foote, U.S. consul-general, arrived in Jogjakarta and conferred with Indonesian cabinet on U.S. offer to mediate dispute. Meanwhile, Sutan Sjahrir, (left), Indonesian envoy to the U.N. security council, and Hadji Salim, minister of foreign affairs, arrived by air in New York.

**YEMEN'S ROYALTY**—Son of the King of Yemen, Prince Seif Al Islam Abdullah arrives at LaGuardia Field, N.Y., by plane from Cairo. The royal visitor is in the United States at the invitation of the government and hopes to establish trade relations between Yemen and U.S.

**WRECKED TRAIN SAWED IN HALF**—Work of clearing the wreckage caused at Kingston, Ont., station when the locomotive of the International Limited left the tracks is proceeding smoothly and efficiently. Workmen are shown here measuring off the distance of the engine before cutting in half.

"Hairpin turn" elimination has been asked by Kingston citizens following wreck that led to death of engineer and fireman. Autopsy showed men died of suffocation and scalds. Master cranes are shown lifting undamaged pullman car to siding.

**NO MORE CHAIN GANGS**—Georgia state highway prison camps were abolished in an order disclosing a new investigation into the July 11 riot at the Glynn county camp where eight Negroes were killed by prison guards. The board's decision to close the state's two remaining camps came after a hearing at which Sam Levine, a member of the Glynn county board of commissioners branded the slayings as "murder".

**BATHING DURING WORKING HOURS**—It's all in the life of a policeman. When a stolen car was driven into the Don river at Toronto, police mechanic Robert Pearce had to dive into the river, fasten a chain to the bumper and haul the car out. It was cool, anyway!

**HAS NEW HOME**—Although she was "adopted" by Mrs. Lawrence Winthrop of New York, some years ago, seven-year-old Paulette Zlotogorski, French war orphan, has only just arrived in her new home. Here Paulette who had been receiving parcels regularly from Mrs. Winthrop, snuggles on her lap and seems interested in a musical career.

**HUBBY GETS DIVORCE SHE ASKED**—Ex-husband of film actress Martha O'Driscoll, shown here, U.S. navy Cmdr. Richard Adams, has been awarded a contested divorce decree on his cross-complaint alleging three years' separation. Miss O'Driscoll sought to divorce Adams both in Los Angeles and in Las Vegas, but the court awarded the decree to him.

**DRUMSTICKS GALORE**—Murray Weiss, a Brooklyn, N.Y., poultryman, proudly holds a barred Plymouth Rock chicken with four legs, two tails and a double-barrelled egg-laying apparatus. Weiss said that his chicken was a four-month-old freak which was hatched from a double-yolked egg. The chicken strolls about on two legs and carries the other pair, both shorter than normal.

**SHOOTING STARS FOR THE NATIONAL GUARD**—Speedy new army air forces' Lockheed P-80B jet-propelled "Shooting Stars" like these will be delivered to the Air National Guard next spring for the training of reserve pilots. Eighty-six of these super-fighter planes, shown on the Lockheed test base at Van Nuys, Calif., will be furnished to the A.N.G. The P-80B has the greatest firepower of any jet fighter plane in the world. Six machine-guns in the nose fire 1,200 rounds a minute. A pilot ejector seat, an air-conditioned pressurized cockpit are new features of the ship.

**CANDIDATES FOR LIFE-SAVERS**—Candidates for lifesaving jobs on Toronto beaches made vacant by strike of lifeguards, showed up on the shores of Lake Ontario. Jill Duff, Mimico, in charge of group of children, is shown demonstrating holds with Bab Grimshaw who hopes for job.

## OUR COMPLETE SHORT STORY—

## Saturday Night

By MARION BOUCHER

PATSY was worried. When, one sixteen, pert, blonde and definitely whistle bait and one hasn't a date on Saturday night, it's a serious matter. The worst of it was that she had been so sure Jim Raine meant to take her out. Hadn't he asked her the other day what she was doing on Saturday night? And when Patsy had answered evasively,

"That remains to be seen," he had said gaily, "I'll be seeing you then." It was as good as a date and Patsy had been secretly triumphant over it. All the girls agreed that Jim was the smoothest boy in collegiate, even though he did seem rather indifferent to their charms.

When her bosom friend, Leila, boasted that she had a date for Saturday night, Patsy said mysteriously that she was going to be "busy" too. Leila had been very curious but Patsy had refused to tell her more. On Saturday afternoon Patsy retired to the bathroom to shampoo her blonde curls. She then took a leisurely bath and emerged from the tub, scented with bath salts, bath powder and her mother's most exotic cologne. She gave herself a manicure, using the bright nail polish Dad frowned upon.

After a critical survey of her wardrobe, she decided that her new

white skirt with the peasant blouse would do for the evening. She would wear her new sandals too, even though they weren't very comfortable.

And now it looked very much as if all Patsy's preparations had been for naught. Here it was seven o'clock and no word from Jim. Of course he worked Saturday afternoons at the corner drug store but he should be finished by now. Patsy hovered uneasily around the telephone.

"Aren't you helping your mother with the dishes tonight?" Dad asked. "Oh yes, sure," she answered and drifted reluctantly towards the kitchen.

When the phone rang a few minutes after, Patsy almost broke a leg in her haste to answer. But it was only for Bob, her older brother. He talked on and on while Patsy prayed fervently that Jim wouldn't try to call while the line was busy. Finally Bob hung up but the phone did not ring again.

"Would you like to go to the movies with Dad and me?" her mother asked, apparently unaware of Patsy's anxiety.

"I don't think so, Mother, I don't feel like going to a show tonight."

"You're not sick, are you Patsy? I noticed you ate very little supper."

"Oh, no, Mother, I am feeling fine."

"Are you going out?"

"Well...I might later on."

"Remember to be home by twelve if you do, dear."

"Oh, Mother, that Cinderella stuff in this day and age! Besides, it's Saturday night."

But her mother was adamant. It was only on special occasions that Patsy was allowed to stay out later than twelve in spite of her vehement protests over this rule.

After her parents had left, Patsy went upstairs and changed into the white skirt and gay blouse. She carefully applied more lipstick and combed her hair again. She could hear Bob splashing and whistling in the bathroom, and soon he went out too. The house was maddeningly quiet—if only the phone would ring! Patsy wandered aimlessly downstairs and turned on the radio. Dance music filled the room and then a girl's voice mocked her:

"Saturday night is the loneliest night in the week..." Patsy shut the radio off.

She looked anxiously at the clock—it was after eight now. What would she do all evening, if Jim didn't call? She didn't dare phone Leila—it would be too humiliating to confess that she was sitting at home doing nothing. Besides Leila had said she was going roller-skating with Davy Low.

Patsy picked up a magazine but found that she couldn't concentrate on what she was reading. She tossed it aside and went to the window. Couples strolled by, talking and laughing in the June night. It was almost more than she could bear—everyone seemed to be out having a good time, except herself.

It was really a man's world, Patsy thought bitterly. Look at her brother Bob—he didn't have to wait for anyone to ask him out. But she was a girl and had to accept her fate. Oh it wasn't fair!

Patsy was on the verge of tears when the doorbell rang. She leaped up. Could it be...? Yes...it was Jim!

"Hi, Pat!" He was a little out of breath. "I was afraid you wouldn't be home. There was a Two-for-One sale at the store and I had to work late this evening—couldn't get around any sooner. How about going to a show?"

"I really didn't care to go out tonight, Jim." She succeeded in sounding very indifferent. "But...well...yes, a show would be fine."

"Sorry I didn't phone you, but the boss wouldn't let me, we were so busy."

Patsy hummed a little tune as she went for her coat. All was right with the world once more: it was Saturday night and she had a date! (Copyright Wheeler Newspaper Syndicate)

## BETTER THAN MEDICINE

Learn to laugh. A good laugh is better than medicine. When you smile or laugh, your brain is freed from the load it ordinarily carries. Learn to tell a helpful story. A well-told story is as wholesome and as welcome as a sunbeam in a sick room. Learn to keep your troubles to yourself and greet your friends with a smile. The world is too busy to linger over your ills and sorrows.

More than half the world's uranium ore from which radium is made, comes from the Belgian Congo.

BENNETT HEIR—H. A. Turner, resident of Vancouver, was bequeathed \$4,000 in the will of the late Viscount Bennett, not Harris Turner, Toronto. Mr. Harris Turner regrets to say that he is not the recipient of the money.

This pattern, easy to use, simple to sew, is tested for fit. Includes complete illustrated instructions. Pattern 4850 comes in girls' sizes 6, 8, 10, 12, 14. Size 10, 2 3/4 yds. 35-in.; 3/4 yd. contrast.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

## RECIPES

## DEVIL'S FOOD CAKE

(2 eggs or 3 egg yolks)  
2 cups sifted Swans Down Cake Flour  
1 teaspoon soda  
1/4 teaspoon salt  
1/2 cup butter or other shortening  
1 1/4 cups sugar  
2 eggs or 3 egg yolks, unbeaten  
2 to 3 squares unsweetened chocolate, melted  
1 cup milk  
1 teaspoon vanilla  
Sift flour once, measure, add soda and salt, and sift together three times. Cream shortening, add sugar gradually, and cream together until light and fluffy. Add eggs, one at a time, beating well after each; then add chocolate and blend. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla. Bake in two greased deep 9-inch layer pans or three greased 8-inch layer pans in moderate oven (350 deg. F.) 25 minutes, or until done. Spread Fluffy Seven Minute Frosting or Mint Frosting between layers and on top and sides of cake.

## BOTH WORK AND WORRY

Prominently posted on the wall of a business establishment is this bit of advice: "Work faithfully for eight hours a day and don't worry; then in time you may become boss and work 18 hours a day and have all the worries."

The original Punch and Judy show was written in 1600. 2739

## More Doctors Are Required In Far North

If they have any desire to hang their shingles on igloos, the door's wide open and there's a large welcome awaiting young physicians at the Health and Welfare Department. It's all in the department's program of furthering the health program of the Indian services division. Since March the number of doctors employed by the division has increased by eight to 45, but more — many more — are needed.

"It's part of our over-all plan to improve the health services to Canada's Indians and Eskimos," said one Health official. "With the physicians we have employed it has been our problem to spread them around where they would do the most good."

From Pangnirtung, on Baffin Island, 350 miles northeast of Cape Dorset where the Nascope was wrecked, to Vanderhoof in the British Columbia interior, the call has gone out for more physicians. And soon the Civil Service Commission will be issuing announcements of examinations to select medical men — with strong constitutions — anxious to play the role of modern frontiersmen.

He may not be able to travel around in a stream-lined automobile, but Canada's doctor of the north soon learns the intricacies of canoes, snowmobiles and dog-teams.

"And I understand he doesn't even have to buy a dog-team—the Eskimos rent them out," said the official.

Other advantages include a large and varied practice and a salary of \$4,800 and \$5,400 a year, with complete medical supplies. And in the really isolated spots provisions, fuel, and quarters, are thrown in.

Nor does the department send its medical officers to northern outposts with an Eskimo dictionary in one hand and a one-way ticket in the other. The tour of duty at an isolated point is never for more than three years and then doctors are transferred to less remote agencies.

## Will Mean Healthful Exercise For Blind

TORONTO.—New fields of healthful exercise and transportation for the blind may be opened by the first three-wheeled, two-seater bicycle designed especially for sightless persons, the Canadian National Institute for the Blind said in Toronto. An Institute statement said the bicycle will enable sightless persons to get the full exercise and enjoyment of cycling with a sighted companion to guide the machine.

## TAGGED WITH GUN

Whales, like birds, are tagged by scientists for migration study, but in marketing whales, the numbers are placed on stainless steel tubes and fired into the whale's thick blubber from a 12-bore gun.

Pasteur's germ theory of disease, established in the 1870s, led to identification of the causes of many major ills.

WANTS ARCTIC RADAR—Gen. Ira C. Eaker of the U.S. army air forces urges a radar "fence" along the Arctic circle to protect the United States from a possible northern attack.

## Nebraska Doctors Have New Theory About Baby's Food

CHICAGO.—Junior at six weeks is old enough to start eating meat, if you are guided by two Nebraska physicians who report successful results.

Dr. Ruth M. Leverton of Lincoln, Neb., and Dr. George Clark, Omaha, authored an article in the Journal of the American Medical Association claiming, "meat presents itself to the pendiatrian and parent as a concentrate source of high quality protein for supplemental feeding at an age when protein requirement, expressed on the basis of body weight, is at its highest."

In addition to feeding 13 six-weeks' old infants in Nebraska institutions, the doctors used 15 other babies as control patients, giving the usual baby diet without meat.

"The nurses considered in general the babies who received strained meat routinely were more satisfied and slept better at night than did the control babies," they reported. "The pendiatrians in charge of the medical care of all the children considered the babies in better physical condition as a result of receiving the meat supplement."

Each baby consumed an average of an ounce of strained meat daily, increasing the protein content of the infant's formula 25 per cent.

## Maid Was Expert And Very Efficient

The New Yorker tells this story: A lady in Greenwich was giving a small dinner party. The maid was new but apparently expert, and everything went swimmingly until the dessert was due. There then ensued a long and uncomfortable wait. This was ended by the arrival of the maid with a Western Union envelope, which she handed to her mistress. The lady ripped it open and found inside a square of brown wrapping paper bearing the pencilled message "Can't find fingerbowls".

## DIFFERENT NOW

Coal was looked upon as a nuisance in Europe as late as 200 years ago. No one thought of burning it, and where the coal seams came to the surface, the hard lumps interfered with cultivation.
